Your Personalized Virtual Doctor

(Team: Loud)

Problems (Health Care Skills)

- Difficult to create alexa skill for every disease/conditions.
 - Disease symptoms/diagnosis/treatment can vary based on age, gender, etc
 - Need developer experience to build skills
 - Need to create elaborate dialog flow / conversational data.
 - Difficult to ask the flow-up questions in such scenarios (How the doctor would do in real life)
- 

Solution

- Reduce the developer demand : **Create 1 skill, change the conversational model.**
 - Simplify the dialog flow /data creation process: **Submit a CSV with the conversational data.**
 - Make the conversation seamless: **Add levels of questions to be asked as follow up questions to a certain problem.**
-
